TOOLS

SKILLS

WORK EXPERIENCE

MODALYS

Senior Product Designer

February 2026 - Present

- Led end-to-end design of an occupational healthcare SaaS product, from research and IA to high-fidelity UI and design system.
- Transformed fragmented workflows into scalable platform features, improving operational efficiency and usability.
- Built information architecture and user flows across 4 core modules, simplifying complex processes like organization structures and employee onboarding.
- Improved form usability and data handling through progressive disclosure and phased data input, reducing user friction.

FACE44

Multidisciplinary Designer

December 2025 - January 2026

- Designed and improved the marketing website and SaaS platform for *crop.photo*, focusing on usability, layout & clarity.
- Collaborated with stakeholders to translate business requirements into functional UI designs.

CLYRO

UX Designer L2

Apr 2024 - November 2025

- Led UX/UI design for 50+ SaaS projects across AI, fintech, and e-commerce, working as a product designer for startups.
- Orchestrated end-to-end platforms from scratch, including dashboards, workflows, and scalable design systems.
- Improved developer handoff and product consistency through structured components and interaction patterns.
- Supported design of 50+ SaaS platforms, contributing to user flows, wireframes, and high-fidelity UI.

TAKHLEEQ

Junior UX Designer

Jun 2023 - Mar 2024

- Created responsive websites for 10+ clients, aligning user experience with business and branding goals.
- Conducted 50+ user research sessions and translated insights into actionable design improvements.
- Reduced design iteration cycles by 40% through structured collaboration and development-ready outputs.
